

### **Aiming to be a Corporation trusted not only by Clients, but also by the Local and International Communities.**

On behalf of everyone at Toyo Engineering Corporation (Toyo), I would like to express our sincere gratitude for your understanding and support for our activities over the years. Toyo provides its esteemed Clients all over the world with specialized services ranging from the project planning phase to the plant operation phase by utilizing its Project Management skills and comprehensive Engineering capabilities.

In the process of plant construction, we place the highest priority on safety, implementing a wide range of safety measures. However, unfortunate situations may arise as the construction work is carried out by humans, regardless of the best possible efforts for preventing errors or mistakes. Should any accident occurs, we immediately report it to the Client and the relevant authorities. We make a thorough audit on the situation, evaluate the cause and effect. The audit results are shared with all the group Companies and other construction sites, so that they can implement necessary and thorough safety measures.

While providing specialized services, Toyo fulfills its social responsibility to protect the global environment by evolving energy- and resource-saving designs and by paying the utmost attention to environmental concerns in plant construction. We will act as a Corporation trusted not only by our Clients, but also by the Local and International Communities.

We would be highly obliged if you could give your valued views on the activities in this "Safety and Environmental Report 2010".

## **Basic Policies on Health, Safety, Security and Environmental (HSSE) and Quality**

Toyo Engineering Corporation and its group companies (hereafter TOYO) recognize that satisfying the HSSE and quality requirements called for by our clients and society is an indispensable prerequisite for us to conduct business activities and to fulfill social responsibilities, and abide by the following eight basic policies.

1. Continuously confirm and share the consensus that “Safety takes precedence over all other considerations”, and realize and maintain safe, sanitary conditions in all workplaces.
2. Strive to complete all jobs with no accidents and no harm to people by enforcing preventive safety measures.
3. Endeavor to provide our personnel with work environment and opportunities that enable them to maintain and improve their mental and physical health.
4. Ensure information security, and take appropriate safeguards against threats and risks to business assets.
5. Minimize environmental burden by saving resources and energy, detoxifying, reducing and recycling waste, and by preventing pollution during the course of our work duties.
6. Provide high-quality products and services that meet the HSSE requirements of our clients and society.
7. Comply with all relevant laws and regulations, the requirements agreed upon with the client, and our in-house rules relating to HSSE and quality.
8. Establish and continuously improve the effectiveness of management systems, including objective setting, hazard identification, risk evaluation, determination of countermeasures, execution control and review, and education and training, in line with management’s firm belief that the securement of HSSE and quality is a prerequisite for business continuity.

These policies shall apply to all staff members of TOYO in any region and country. TOYO will also share the spirit defined by these policies with clients, business partners, and other related parties, and cooperate with them to achieve these objectives.
