

Amendment to Health, Safety and Environment Policy

In August 2000, TEC revised its Health, Safety, and Environment Policy. To fulfil our social responsibility as an engineering firm, all officers and employees are called upon to perform their tasks in compliance with the following policies:

KERTIH VINYL CHLORIDE MONOMER (KVCM) Project in Malaysia— Six million working hours with no accidents and no injuries recorded

At the KVCM project site, we recorded a total of six million working hours without any accidents and injuries on August 12, 2000 (the 850th day since the start of site works in March 1998). Mr. Tengku, CEO of VINYL CHLORIDE (MALAYSIA) SDN. BHD. (VCMSB), presented commemorative certificates to the members of the contractor consortium led by TEC, the members of the Project Management Contractor (PMC) Service consortium, and the client project team. VCMSB's parent body, PETRONAS, has a very deep interest in health, safety, and the environment, and the achievement of this record has enabled TEC to further enhance its reputation as an EPC contractor.

Our policy is to ensure the continuation of no accidents and no injuries by having every person working at the site constantly accord the utmost priority to safety and every single person strive to maintain a healthy working environment. To put this policy into practice at the site, we have provided education and training on safety procedures for our employees and others who work with us and continually enhanced awareness of the importance of safety.

NEWS

TEC Home Page Has Now Been Updated

We have been updating TEC's Home Page since the end of June 2000, and it is now available for viewing. In addition to providing even more investor relations (IR) information, we have developed content for use as a business tool.

[Address of the official Home Page: <http://www.toyo-eng.co.jp/>]

This Home Page presents a variety of topics covering TEC's business activities, plant business, industrial systems business, energy solutions business, Plant IT business (linked to the EPSource.com website), environmental preservation, technology (linked to the Engineering Cafe (e-cafe) website), and business information, including IR content, in an easily understandable format. In the page of industrial systems business, we provide a wealth of information concerning solutions and products. The solutions and products that we offer customers combine IT, production, and logistic technologies and incorporate highly competitive systems, covering the whole supply chain.

[Address of the EPSource.com Home Page: <http://www.epsource.com/>]

This is an engineering ASP (application service provider) site that provides support for the facilities of processing industries throughout their life cycle. Besides distributing engineering applications, we offer procurement services and consultation services.
